Cosmetics

PURE COLD-PRESSED
SWEET ALMOND OIL
With natural preservatives

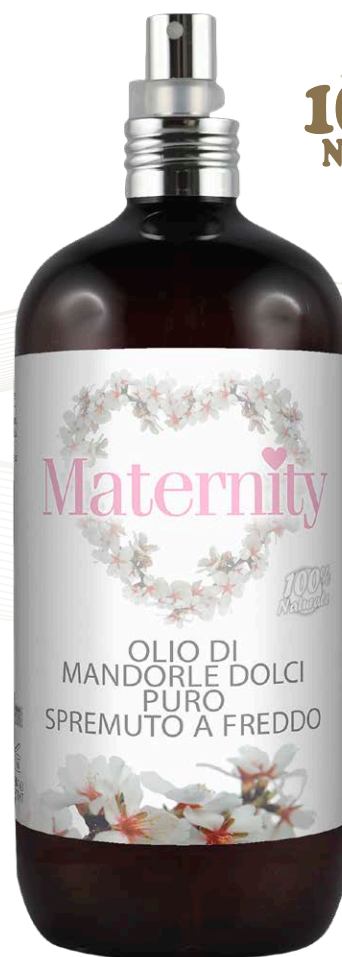

Format 500 ml

Cod. 0040020054

100% natural pure sweet almond oil. Emollient, soothing, nourishing and elasticizing, rich in Vit. A, B, E, minerals and bioflavonoids. During pregnancy, it is indicated to counteract the appearance of stretch marks and after childbirth to recover skin tone of abdomen, breasts, buttocks and legs. It restores softness and elasticity helping the woman's body to adapt to new shapes.

Obtained by cold pressing the ripe seeds of *Prunus Amygdalus Dulcis*, an extraction process that keeps all the characteristics and functional properties unaltered.

With natural preservatives, without essential oils, petrolatum, paraffins, silicones, sulphates, alcohol, dyes, nickel and other heavy metals.

DIRECTIONS FOR USE:

Apply on the area to be treated with a light massage.

DRENA BENDAGE

NEW
'21

Format 2 soaked bandages

Cod. 1010020180

● *Special heavy legs*

Draining and refreshing treatment to relieve the feeling of heaviness and swelling of the legs during pregnancy. The synergistic action of Horsetail and Nettle extracts, together with sea salts, promotes microcirculation and has an effective draining action. Without alcohol, parabens, petrolatum, paraffins, silicones, sulphates, allergens, essential oils, dyes, nickel and other heavy metals.

DIRECTIONS FOR USE:

Wrap around each leg starting from the ankle, taking care that the bandage with each round overlap by 3/4 cm. The bandage of the right leg should follow the counterclockwise direction, on the left the clockwise direction. Climb up to the hips, buttocks and abdomen. Leave to act for 20/30 minutes wrapping the customer in the cartene. Remove the bandages and complete the treatment by applying the specific products of the same line. In order to enhance the cooling effect, keep the product in the refrigerator. Single use product.

Home dermocosmetic products indicated for the treatment of the expectant mother. They help the body to adapt to the new shapes by preventing the appearance of stretch marks and to recover tone and elasticity in the post-pregnancy phase.

PERINEUM OIL

Format 100 ml

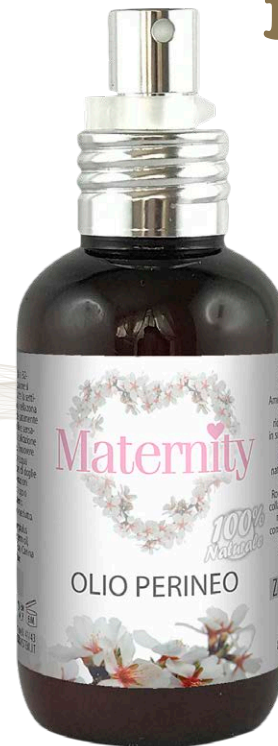

Cod. 0040020077

NEW
'21

Rich oil for massaging the perineal area before and after childbirth. It softens, elasticizes and relaxes the tissues in preparation for childbirth, reducing the risk of lacerations and, subsequently, helps to quickly recover skin elasticity and tone. The synergistic action of 100% natural Sweet Almond, Wheat Germ and Peach oils and Dog-Rose extract activates the production of collagen and elastin, protecting and regenerating skin tissues. With natural preservatives, without essential oils, petrolatum, paraffins, silicones, sulphates, alcohol, dyes, nickel and other heavy metals.

SkinSystem[®]
Cosmetics

100%
NATURAL

DIRECTIONS FOR USE:

Starting from the 32-34th week of gestation, it is recommended to apply a few drops of oil to the perineal area 2/3 times a week and massage gently for about 5-10 minutes. A slight tingling sensation after application is considered normal. Remove any oil residues with warm water. Do not use in case of early contractions. For more information, consult your midwife.

BREAST OIL GEL Rhagades-Stretch marks

NEW
'21

Format 150 ml

Cod. 1010020178

Specific gelled oil for the treatment of the breasts of pregnant and breastfeeding women. It prepares the nipple for breastfeeding, counteracts the appearance of rhagades caused by the baby's suction. Rich in nourishing and emollient substances, it creates a thin protective layer on the skin, elasticizing the skin, preventing the dryness and easing the itching. In this special formula, pure sweet Almond Oil and vitamin E present in high concentrations, are combined in the prevention and treatment of stretch marks. With natural preservatives, without allergens, essential oils, petrolatum, paraffins, silicones, sulphates, alcohol, colorants, nickel and other heavy metals.

DIRECTIONS FOR USE:

Apply a small amount of product on the area to be treated and massage gently until it is completely absorbed. Repeat the operation at least twice a day or as needed. As a preventive treatment for rhagades: it is recommended to start using the product about 30 days before giving birth to moisturize and protect the nipple and prepare it for breastfeeding. In case of breast rhagades: apply on the nipple and massage gently for a few seconds. It is recommended to apply after breastfeeding, in order to protract the protective action until the next breastfeeding.

DRENA GEL

NEW
'21

Draining and
refreshing gel for
the legs

Format 200 ml

Cod. 1010020181

● *Special heavy legs*

Draining and refreshing treatment to relieve the feeling of heaviness and swelling of the legs during pregnancy. The synergistic action of Horsetail and Nettle extracts, together with sea salts, promotes microcirculation and has an effective draining action. Without alcohol, petrolatum, paraffins, silicones, sulphates, allergens, essential oils, dyes, nickel and other heavy metals.

DIRECTIONS FOR USE:

Apply on the legs with a light massage from the bottom upwards until completely absorbed, repeat the application if necessary. In order to enhance the cooling effect, keep the product in the refrigerator.

Protocol

Professional Nourishing/elasticising protocol *

Product	Quantity	How to use
PURE VITAMIN E CONCENTRATE	A few drops	Apply directly to the area to be treated.
SHEA BUTTER and/or SWEET ALMOND OIL	1 nut / 5-10 ml	Apply the product and proceed with the appropriate massage technique.

From the 4th to the 7th month of pregnancy, one cabin treatment every two weeks is recommended, and from the 8th to the end of pregnancy one treatment per week. **

Professional Relaxing/draining protocol *

Product	Quantity	How to use
DRENA GEL	30 g	Apply on the legs with a light massage from bottom to top until completely absorbed.
DRENA BENDAGE	1 / 2 bendage	Wrap around each leg starting from the ankle, taking care that the bandage overlaps by 3/4 cm at each turn. The bandage of the right leg must follow the anticlockwise direction, on the left the clockwise direction. Rise up to the hips and buttocks. Leave to act for 20/30 minutes, wrapping the client in cartene.
SWEET ALMOND OIL	5-10 ml	Apply the product and proceed with the appropriate massage technique.

From the 4th to the 7th month of pregnancy, one cabin treatment every two weeks is recommended, and from the 8th to the end of pregnancy one treatment per week. **

* The two protocols can be paired and performed in the same week as needed. ** The protocols can also be performed after pregnancy until the desired result is achieved.

Home treatment

To maintain and enhance the effect obtained, we recommend the home use of the products of the maternity line for the whole duration of the treatment and in the following months.

Morning	Evening
Pure Vitamin E, Almond Milk Distribute a few drops of Pure Vitamin E directly on the area to be treated, apply a nut of Almond Milk and perform delicate circular movements until completely absorbed.	Pure Vitamin E, Shea Butter, Sweet Almond Oil 250 ml Distribute a few pure Vitamin E directly on the area to be treated, apply a nut of Shea Butter or a few drops of Sweet Almond Oil and perform gentle circular movements until completely absorbed.

DRENA GEL: Apply on the legs with a light massage from the bottom upwards until completely absorbed, repeat the application if necessary. In order to enhance the cooling effect, keep the product in the refrigerator.

BREAST GEL OIL: Apply a small amount of product on the area to be treated and massage gently until it is completely absorbed. Repeat the operation at least twice a day or as needed. As a preventive treatment for rhagades: it is recommended to start using the product about 30 days before giving birth to moisturize and protect the nipple and prepare it for breastfeeding. In case of breast rhagades: apply on the nipple and massage gently for a few seconds. It is recommended to apply after breastfeeding, in order to protract the protective action until the next breastfeeding.

PERINEUM OIL: Starting from the 32-34th week of gestation, it is recommended to apply a few drops of oil to the perineal area 2/3 times a week and massage gently for about 5-10 minutes. A slight tingling sensation after application is considered normal. Remove any oil residues with warm water. Do not use in case of early contractions. For more information, consult your midwife.

Baby Care

HOW TO PERFORM NEONATAL MASSAGE

- Perform delicate pressure alternating with small circles on the small foot without forgetting to gently press and turn each little finger and rise up from ankle towards the little leg.
- Proceed with the other little foot and little leg by performing the operation several times.
- Once arrived on the tummy proceed with the hands perpendicular to the body of the baby that will be moved in alternating direction starting from the top to the bottom of the abdomen.
- Then gently place the palm of your hand on the tummy and make circular movements in a clockwise direction starting from the right side of the baby.
- Finally run "the walk" with the fingertips from left to right.
- In a prone position, use your thumbs to make large circles on the baby's bottom to the height of the kidneys, then

- reducing the circumference by climbing up to the shoulders.
- Then exert pressure with the indexes starting from the neck alternately going down on the shoulders.
- Finally go down with the whole palm of your hand towards the coccyx alternating one hand with the other.
- Repeat the movement several times.
