ALGO BOTANIC MASKS

Alginate masks

The SkinSystem laboratories have developed cosmetic formulations based on alginates from primeval seas and plant extracts.

Peel-off masks that follow and are perfectly modeled on the micro-reliefs of the skin, greatly improving the hydration and structure of the dermis.

Safe formulations free of crystalline silica, preservatives, sulphates, petrolatum, silicones.

ALGO BOTANIC MASKS

PURIFYING

SkinSystem alginate masks guarantee excellent spreadability, thanks to their creaminess. They are easy to use, to remove and respect the skin's pH.

The normal passage of alginate from a creamy mixture to its solid form results in an immediate lifting effect, while the occlusive effect reduces the migration of water to the outside (TEWL) and stimulates the skin to recall oxygen from the deeper layers of the dermis, thus reactivating the cutaneous circulation.

The micro-sweating generated between the mask and the skin, associated with the reduction of TEWL, favors the penetration by osmosis of the active ingredients present in the mask or previously applied to the skin.

SkinSystem Algo Botanic Masks reactivate cellular metabolism and perform an important detoxifying action. The skin will appear hydrated, compact and luminous already from the first applications.

SkinSystem Algo Botanic Masks are available in two variants with a soothing and purifying function.

SOOTHING

ALGO BOTANIC MASK

SOOTHING

Soothing Alginate Mask

Cannabis Sativa Oil,
Gluconolactone

Soothing Peel-Off Mask based on alginates from primordial seas, Hemp oil and Gluconolactone, regenerates and protects the skin by restoring its normal hydro-lipid barrier.

It improves the hydration and structure of the dermis, stimulates the production of collagen and elastin, ensuring elasticity and the progressive well-being to the skin.

It reactivates microcirculation and stimulates cell turnover, giving brightness and compactness.

For an hydrated, healthy-looking skin.

Ideal for all skin types, especially dry and reddened skin that needs relief.

ALGO BOTANIC MASK

PURIFYING

Purifying Alginate Mask

Bixa Orellana extract, Silver, Gluconolactone

Purifying Peel-Off Mask based on alginates from primeval seas and Bixa Orellana extract, Silver and Gluconolactone, counteracts the onset of skin imperfections, regulates sebum production and reduces pores.

Normalizing, soothing and moisturizing, it restores the normal hydrolipidic barrier of the skin, smoothing the complexion and counteracting the shiny effect from the first application.

Regenerates damaged skin tissues by minimizing acne scars.

Suitable for oily, impure and acne-prone skin thanks to the antibacterial and healing action of silver in synergy with Bixa Orellana.

PURIFYING

Two black bowls are shown. The top bowl contains a bright green powder, and the bottom bowl contains a reddish-brown powder. Both powders have a fine, granular texture.

ALGO BOTANIC MASKS

- Neutral pH
- Without preservatives because it does not contain: formaldehyde, phenoxyethanol, parabens
- Phthalates and gluten free
- Dust free
- Formulated without diatomaceous earth
- Formula with ingredients of natural/vegetable origin
- Mixing ratio water/powder (by weight): 2:1
- Drying times: 9/13 min.
- Pack: 500 g bag

HOW TO USE

Measure the water and powder in the proportions 2: 1 using the measuring cups included in the box.

In a suitable container, first pour the powder and then the water.

Mix to obtain a homogeneous mixture and apply with a brush on the skin starting from the neck upward.

Drying times 9/13 minutes.

Leave on for 15/20 minutes and remove the alginate with your hands starting from the base of the neck, from the bottom up.

Before removing, it is advisable to lift the edges of the mask also with the help of a damp sponge.

Since 1996 SkinSystem has been producing depilatory waxes and cosmetic products.

Its laboratories are engaged in a constant activity of Research and Development that allows the creation of products capable of meeting high quality standards.

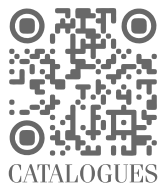

The meticulous quality control, carried out in each phase of the product realization, ensures that this one strictly meets the characteristics required by the market and that it complies with the current regulations.

The company operates in compliance with the EU Cosmetic Regulation 1223: 2009 and ISO 22716 (GMP - Good Manufacturing Practice), thus ensuring the safety of the product and the health of the consumer.

The SkinSystem Professional Line offers products with a high potential of effectiveness that do not contain parabens, paraffins, petrolatum, heavy metals, sulphates and that respect the skin and the environment.

A photograph of a modern, single-story building with a light-colored facade. The building features a large, multi-paned glass window that reflects the surrounding environment. To the left of the window, the word "SkinSystem" is mounted on the wall in a stylized, metallic font. The sky is clear and blue, and the ground in front of the building is a light-colored concrete or paved area.
