

Collagena ^{NEW}

Hydrolyzed Collagen and
Hyaluronic Acid Films

Sublima ^{NEW}

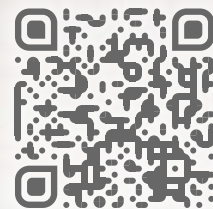

Hydrolyzed Collagen Patches

Immediate hydration

*Stimulation of the production
of Collagen and Elastin*

*Glass Skin effect: compact,
minous skin with a uniform texture
and a healthy, radiant appearance*

Collagen has
a new shape.®

Tensor Threads

Biostimulating Collagen Threads

Reticulum[®]

Hydrolyzed Collagen Reticulum

- *Filling of
expression lines*
- *Redefinition of facial
geometries*
- *Immediate tensor effect
and skin lifting*

Tensor Threads

Biostimulating Collagen Threads

Cosmetic threads for the treatment of wrinkles, loss of tone, elasticity and definition of the oval. Made of Collagen fibers and Biopeptides, capable of penetrating inside the skin, stimulating the fibroblasts to synthesize new filaments of collagen, elastin and hyaluronic acid and reorganize the elastic fibres, giving tone and an immediate lifting effect. They smooth out wrinkles, plump the tissues, giving the skin hydration, smoothness, brightness and firmness. They allow a dual targeted action:

- Immediate Filling Action, applying the thread directly to the wrinkle.
- Lifting Action, following a technique developed by a team of professionals in collaboration with SkinSystem.

Reticulum®

Hydrolyzed Collagen Reticulum

Very thin Collagen filaments in the form of a reticulum, made with Collagen Fibres, Silk Fibers and Hydrolyzed and Biocompatible Oligopeptides, capable of dissolving in the skin and conveying themselves deeply and stimulate fibroblasts to synthesize new filaments of collagen, elastin and hyaluronic acid.

Its special shape allows an easy use by the professional who will be able to apply it not only on the face, but also on other parts of the body affected by skin aging.

Used in combination with Biostimulating Collagen Tensor Threads, Reticulum allows to associate the targeted action of filling the wrinkle or lifting a sag produced by the thread with a more extended toning and plumping action on larger areas.

Collagena

Hydrolyzed Collagen and Hyaluronic Acid Films

Applied like a second skin and dissolved with the help of the Collagen Serum, the Films penetrate into the deep layers of the dermis providing "the bricks" for the synthesis of new collagen, elastin and hyaluronic acid, reorganizing the extracellular matrix. They slow down the skin aging, blocking the degenerative processes that cause the premature deterioration of the skin.

The Collagena Films are formulated exclusively with hydrolysed and dehydrated active ingredients (99% Hydrolysed Collagen and 1% Hydrolysed Hyaluronic Acid) which, upon contact with the skin and the activator Collagen Serum, dissolve and penetrate deeply, guaranteeing an immediate and long-lasting plumping effect, redefining the facial volumes and giving the skin the Glass Skin effect of Korean cosmetics, for smooth, compact, luminous, nourished and protected skin, with a uniform texture and a healthy, radiant appearance.

Sublima

Hydrolyzed Collagen Patches

Intensive Wrinkle Treatment with Hydrolyzed Collagen Patches & Collagen Serum, specific for the periocular, frontal, nasolabial areas and for lip, neck and décolleté.

The Sublima Patches are formulated with Collagen fibers and hydrolyzed Biopeptides, characterized by a high and autonomous transdermal vehicular capacity.

Upon contact with the skin and the activator Collagen Serum, the Patches dissolve and the active ingredients of which they are composed penetrate deeply, stimulate fibroblasts to generate new collagen and reorganize elastic fibres.

The treatment ensures an immediate tensor, filling and plumping effect and, in the medium to long-term, re-educates the cells in their important function of producing collagen and elastin, providing structure and tone.

the Result:

Visibly reduced wrinkles, toned and elastic skin, face oval redefined in the contours.

the Result:

Visibly reduced wrinkles, toned and elastic skin, face oval redefined in the contours.

the Result:

Plumped tissues, redefined facial volumes, Glass Skin effect.

the Result:

Filling of the wrinkles, plumped tissues and immediate lifting effect, hydrated, smooth and luminous skin.
